

Boulder City Hospital's Emergency Preparedness Plan

Boulder City Hospital and Long Term Care has an established Emergency Preparedness Plan that is based on an all-hazard approach. Through our partnership with the Southern Nevada Emergency Preparedness Coalition and the Rural Healthcare Preparedness Coalition the plans that have been developed include:

Earthquakes	Telecommunications Failure	Medical Surge	Hazmat Incidents
Public Health	Natural Gas Failure	Cyber Attack	Radiological Exposure
Flash Floods	Liquid Gas Failure	Active Shooter	

This is not an all inclusive list.

The ability of Boulder City Hospital to remain open and operational during time of disasters for our Community is very important to us.

If you would like to discuss these plans further, please feel free to contact Kirk Lambert, Safety Officer or Andre Pastian RN Patient Safety Officer at 702-293-4111.
